DETAILED ACTION

This Office Action is in response to the preliminary amendment filed on 4 August 2006. Claims 21-24 are canceled. Claims 1-20 and 25 are pending.

Election/Restrictions

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claims 1-8, drawn to the special technical feature of a method of identifying a compound that inhibits HIV replication.

Group II, claims 9-13, drawn to the special technical feature of a compound and a pharmaceutical composition comprising at least one compound and a carrier.

Group III, claims 14-19 and 25, drawn to the special technical feature of a method of administering a compound or a pharmaceutical composition comprising the compound.

Group IV, claim 20, drawn to the special technical feature of a kit comprising a standard compound, an applicator, a cell wherein HIV virion production is dependent on Rev expression and a cell wherein HIV virion production is independent of Rev expression.

The inventions listed as Groups I-IV do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

As set forth above, each group requires a technical feature that is not required by any of the other groups.

The common technical feature among these inventions is a compound inhibitor of HIV replication in a cell. Such a technical feature is disclosed in Hsu *et al.* (US 5,070,010, 3 December 1991). See column 1, lines 26-52 and column 2, lines 13-42, for example. Therefore, the technical feature is not a contribution over the art, thus, the claimed invention cannot be said to have unity of invention.

Should Applicants elect Group II or III, Applicants are further required to elect one of the compound species as listed in claim 11 or 25. These species do not relate to a single general inventive concept for the same reasons as set forth above.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

The examiner has required restriction between product and process claims. Where applicant elects claims directed to the product, and the product claims are subsequently found allowable, withdrawn process claims that depend from or otherwise require all the limitations of the allowable product claim will be considered for rejoinder. All claims directed to a nonelected process invention must require all the limitations of an allowable product claim for that process invention to be rejoined.

In the event of rejoinder, the requirement for restriction between the product claims and the rejoined process claims will be withdrawn, and the rejoined process claims will be fully examined for patentability in accordance with 37 CFR 1.104. Thus, to be allowable, the rejoined claims must meet all criteria for patentability including the requirements of 35 U.S.C. 101, 102, 103 and 112. Until all claims to the elected product are found allowable, an otherwise proper restriction requirement between product claims and process claims may be maintained. Withdrawn process claims that are not commensurate in scope with an allowable product claim will not be rejoined. See MPEP § 821.04(b). Additionally, in order to retain the right to rejoinder in accordance with the above policy, applicant is advised that the process claims should be amended during prosecution to require the limitations of the product claims. **Failure to do so may result in a loss of the right to rejoinder.** Further, note that the prohibition against double patenting rejections of 35 U.S.C. 121 does not apply where the restriction requirement is withdrawn by the examiner before the patent issues. See MPEP § 804.01.
